## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1 and 2 are rejected under 35 U.S.C. 102(b) as being anticipated by US Patent 4,917,556 to Stark et al.
3. Stark et al. teaches a vacuum processing apparatus for substrates comprising cassette 402 for holding substrates to be processed, cassette 404 for holding dummy substrates, table 407 for supporting the cassettes, a plurality of processing chambers 301a-e, and transferring chamber 406, conveyors 405 and 201a, and control means for transferring substrates from the cassettes to the process chambers one by one such that the substrates to be processed and the dummy substrates don't coexist in the same chamber in vacuum. Note column 2, line 32- column 3, line 42; column 4, lines 47-62; and Figure 1.

### ***Conclusion***

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Mahler, Messer et al., and Landau et al. teach similar substrate processing apparatus.
